

# Turn your class-notes into revision-notes through visual illustration

**Figure 1: Key-words can be extracted from texts to make a mind map. This example was quickly created using software called Mind Manager.**

**Figure 1. Mind Mapping**

**Figure 2: Key-words can be extracted from class-notes and displayed in a concept map. This 3D 'Vertical Chevron List' is offered by Microsoft Word's Smart Art tools to help visually represent information in sequence.**

**Figure 3: Key-words can be written out by hand and ordered into numbered sections and sub-sections. This route map offers a simple diagram technique to show key-words in sequence. This is useful for essay content.**
